

**Hello my fellow brothers and sisters in Christ. My name is Holly Garces, I live in Sikeston MO.**

I'm married to the love of my life and have two beautiful miracle daughters. My husband and I serve at my parent's ministry, and my husband has played a major role in leading worship and our church has had the honor of hosting a ton of the regional revivals in our area. Some would call it a "revival hub".

I've grown up in church my entire life, I guess you could say I was literally raised in revival. I've got to literally have a front row seat to amazing, genuine moves of the Spirit.

In 2024, I got to witness the purest move of God, in all my 30 years, that I have ever seen.

In the spring of this past year, in the small town of Bertrand MO, a tent revival broke out for multiple weeks. It was chilly at night, but the fire of God burned. The moment you stepped into the white tent, you could feel the presence of God, and the hunger of the people. No one cared who preached, no one cared what worship song was sung, all they wanted was to encounter God. And when I tell you, God truly met us there! So many were saved! Over 100 baptisms! Dozens of families restored! There were Baptist there, Methodist there, Pentecostals there, but most of all the Holy Ghost was there. Since that revival happened it's as if the heavens have opened over our region and I can boldly and confidently report that revival has hit the land. Everywhere you look, different tents, different revivals, different prayer gatherings have sparked. We have seen healings, salvations, rededication's, religious walls crumbling, pastors of different denominations praying with and for each other, unity like I have never seen, and pursuit after the presence of God. The only thing we haven't physically seen yet, is the dead raised.. but even though we haven't seen that in the natural yet, in the spiritual I can't even begin to count the spiritual tombs that have been opened!

We are already hearing reports of plans for upcoming 2025 revivals, and it's as if we are all sitting on the edge of our seats.

Back in the 60s here in the small town of Sikeston, there was another tent revival that came to the area. Evangelist Lenard Connor preached every night. Back then, there was a big shoe factory that employed most of Sikeston. Both my grandma and grandpa and several other family members worked there. It is said that the tent revival would start at midnight, that way all the workers of the old factory would have a chance to attend. In that revival the majority of my family was saved. My prayer and desire for 2025 for my region is that the God would breathe on the embers of that revival. That as the spiritual clock of this nation, and generation strikes midnight.. the darkness time of night, that a new revival would begin to stir. That the fire and hunger that generations past had, would begin to rise up! That we would see the God of our fathers. My prayer is that we would not chase after a move of God, but the God of the move. That just as this region sits on the New Madrid fault line, spiritual shock waves

would echo through out the land.

So I encourage you, prepare your hearts... there's a move coming! There's a shift coming! There is a turning of the tides... will you be revival ready?
